

MAP Trainer Status and Train the Trainer Registration

MAP Trainers needing to maintain “Approved MAP’ Trainer status who will not be able to come into compliance with the new MAP policy by December 31, 2023, will need to complete Train the Trainer (TTT). In anticipation of this requirement, expanded enrollment for the TTT course is being offered for this coming November and January 2024. The course start dates are November 7th and January 9th. Registration can be completed by contacting your Area or Regional MAP Coordinator. Their contact information is in the State Agency Contact List, see link below.

[09.29.2023 MAP State Agency Contact List ALL.b.pdf \(mapmass.com\)](#)

The TTT course is completed online and consists of 5 Steps that can be completed at your own pace. The course can be completed in two weeks, but the average completion time is three to four weeks.

The course capacity has been expanded to accommodate the anticipated need but there will be a limit on the number of participants per course. It is requested that if you work for a Service Provider that may need to have many MAP Trainers complete the TTT course, limit the number of MAP Trainers registered per course start date. This will ensure enrollment space for MAP Trainers who work for smaller Service Providers that need to fulfill this requirement as soon as possible. There will also be a February TTT course added to accommodate MAP Trainers who still need to fulfill this requirement.

Any questions regarding this process, please don’t hesitate to contact your Area or Regional MAP Coordinator for further information.

Thank you,
DDS/DMH/DCF/MRC MAP Administrators

Please send any technical questions to CDDER@umassmed.edu.
